THE EVENING DISPATCH.
PROVO CITY, JULY 31, 1895

The hot weather is driving the people to the mountains, the majority going to Castella. The hotel accommodations are taxed to their full capacity, but there is always room for more.

A PROSECUTION has been unearthed in Logan and the local papers contain much sensational reading these days. The name of the prosecutor is Mary O'Brien. She is alleged to be a bad woman. Her business has been to poison the minds of innocent girls fifteen years old and younger with lustful ideas and then turn them over to young men with whom she had previously made a bargain.

The county court sitting as a board of equalization are making reductions and adjusting assessments. Today they are considering the valuation of Provo business property as assessed for taxation, which is considered very high.

AN excursion from Murray, 250 strong, went up to Castella yesterday. Castella seems to be booming.

TIM SCOTTOR, butcher of this city, received a telegram last evening announcing the accidental killing of his son Frank A. Scottor near Fillmore yesterday forenoon. This morning Mr. Scottor went down to Fillmore taking with him a casket. The remains of the young man will be buried tomorrow (Thursday). Deceased was a young man just past twenty-four years old, tall and stately being 6 feet, 3 inches in height. He was well known here, having visited with his father here in Provo often. He was married last winter and was in the canyon east of Fillmore cutting timber with which he intended erecting him a house. He had chopped down a large tree which fell against another and lodged. In working to get it down the top of the standing tree was broken and fell striking the young man on the back of the neck breaking it and killing him instantly.

SEREN CONRAD treated THE DISPATCH today to a half bushel of the largest, sweetest and best flavored peaches it has been our lot to taste this year.

A LONG LAND.

One state after another goes against woman suffrage. It is now Massachusetts which follows in the wake of New Hampshire and South Dakota and New York and Kansas, all of which have voted against it within a half year. We are most surprised at Massachusetts, where the women constitute a large majority of the population, unlike in South Dakota and Kansas, where the men are in the ascendancy, or in New Hampshire and New York, where the proportion of each of the two sexes is about equal.

Five stunning blows to women suffrage within a few months; blows from the Bay State, the Empire State, the Granite State, the Sunflower State and the Swingstate; blows from the voters at the ballot box in one state, from a constitutional convention in another and from the legislature in three states. It is enough upon woman suffrage.—New York Sun.

ABSOLUTELY PURE

NEW CURE FOR DIPHTHERIA.
European Hospitals Practicing a Method of Blood Inoculation.

So many thousands of children are annually carried off by diphtheria, the sufferings caused by the disease are so agonizing and the remedies hitherto at the disposal of the medical profession so inadequate that the news of the introduction into the Berlin and London hospitals of a new and efficacious cure for this fatal malady cannot be regarded otherwise than as a matter of public interest.

Very little has been heard about this remedy, owing to the fact that the distinguished bacteriologists engaged in its discovery have been unwilling to subject themselves to the same disadvantage as Dr. Koch, whose cure for consumption has been unjustly proclaimed a failure merely because it was published to the world prematurely and before it was ready for medical application. The new cure, briefly speaking, is one of inoculation, with this difference—that, instead of injecting the poison into the system of the patient, one injects the blood of an animal which has been inoculated with a weak culture of the diphtheria bacteria, the virus of the latter being, however, so weak a character that it does not affect the animal with the malady, but merely renders it immune thereto.

Repeated experiments made of late have shown that a few drops of blood from a horse or any other animal thus rendered immune injected into a human being suffering from diphtheria are sufficient to arrest and cure the disease. Of course it is too soon as yet to quote the statistics of the few hundreds of cures which have been effected in Berlin and London by this treatment, which is to be fully discussed in all the complicated scientific aspects at the forthcoming international congress of hygiene in September at Budapest. But, whatever the ultimate result of its application, it has at least one advantage over all other forms of inoculation hitherto discovered—namely, that the matter injected into the system of the patient is free from poison and consequently harmless.—New York Tribune.

A Scotch gentleman, plagued by poachers, procured a cork leg dressed in a stocking and shoe and sent it through the neighboring village by the town crier, who proclaimed that it had been found in a moorland track.

Cure for Headache.

A remedy for all forms of headache Electric Bitters has proved to be the very best. It effects a permanent cure and the most dreaded habitual sick headaches yield to its influence. We urge all who are afflicted to procure a bottle, and give this remedy a fair trial. In cases of habitual constipation Electric Bitters cures by giving the needed tone to the bowels, and few cases long resist the use of this medicine. Try it once. Large bottles only Fifty cents at Smoot Drug Co.

MEXICAN LANDS
Thirty Thousand Acres of Excellent Land at a Low Price and Upon Easy Terms—Intending Purchasers Should Write to Mr. Britton Davis at Corralitos State of Chihuahua, Mexico.

For sale 34,000 acres of land, a part of the Boca Grande Grant, situated in the northwest part of the state of Chihuahua, Mexico, near the U. S. boundary line, 50 miles due south of Dominga, New Mexico; one and a half miles on each side of the Casas Grandes river, and having a range of at least 75,000 acres.

This tract affords a range with permanent water, unsurpassed, an examination is invited.

This is a fine cattle country, and the land is located so that with suitable dams and ditches a large portion of it can be put under cultivation. It is owned by responsible Americans, who desire to dispose of it to settle the estate of the principal owner who recently died.

It was acquired with a view to the organization of a colonization company.

A large and prosperous Mormon settlement is situated adjoining the above tract, and that circumstance makes this tract of great value and interest to the people of Utah. It would be well for some of our capitalists to investigate this matter.
